

May Science

Every great scientist keeps a journal of observations, thoughts, and findings. You may have started a Science Journal with your child or you may be starting this month. There is a printable science journal for the month attached.

Each page will have a space to record the date and time of your child's entry. Tell them that this is what Scientists do to keep track of what they learn.

Each page will have a place for your child to draw something they learned about flowers and gardens during the week. There will also be space for you to write down what your child tells you about flower and gardens each week.

Are you ready to be a scientist? Let's get started using the journal pages for our work with flowers and gardens!

This Science Journal

Belongs to:

Science research conducted on

Flowers and gardens

May 2015

Science Log date: May 2015, week 1

The work being done by this Scientist is important. Because of this work, the Scientist will know more about the world.

What I have learned this week about flowers and gardens is shown below:

Date:

Time:

These scientific notes were recorded by the scientist's lab assistant.

This week the Scientist has learned:

1.

2.

3.

Science Log date: May 2015, week 2

The work being done by this Scientist is important. Because of this work, the Scientist will know more about the world.

What I have learned this week about flowers and gardens is shown below:

Date:

Time:

These scientific notes were recorded by the scientist's lab assistant.

This week the Scientist has learned:

1.

2.

3.

Science Log date: May 2015, week 3

The work being done by this Scientist is important. Because of this work, the Scientist will know more about the world.

What I have learned this week about flowers and gardens is shown below:

Date:

Time:

These scientific notes were recorded by the scientist's lab assistant.

This week the Scientist has learned:

1.

2.

3.

Science Log date: May 2015, week 4

The work being done by this Scientist is important. Because of this work, the Scientist will know more about the world.

What I have learned this week about flowers and gardens is shown below:

Date:

Time:

These scientific notes were recorded by the scientist's lab assistant.

This week the Scientist has learned:

1.

2.

3.
